NENergy

Challenge your friends and colleagues to save energy in daily routines

It starts with little things...

- NENergy is innovative use of social media, where you can track down the little (or big) things you do to save energy
- NENergy also gives you tips how you can increase your energy saving and shows how your little actions impact your and the whole world's energy usage

Gamification for greater results

- In NENergy you can compete with your friends and colleagues to achieve results
- You'll also unlock achievements, if you improve your energy habits

The Application

Thank you for listening!

Team Finn Countdown
Nyyti Kinnunen

Campaigns for companies

- Companies can great their own community in NENergy and set a goal for their total energy saving
- Different departments in the company can compete against each others, which will motivate people

Nationwide environmental campaigns

- With NENergy companies and foundations can create big environmental campaigns for the whole country to achieve greater awareness of our energy issues and get the public to save energy more actively

The Application

Used technologies

- JavaScript
- Bootstrap
- AngularJS
- JQuery

Integrating open data

- The application will use the open data sets to demonstrate the impact users actions have on the world wide energy consumption
- The application will also tell the user what would happen if he would continue with the good habits or if the whole country would act the same way

Communities

Matti Mainio
16.05.14
1.8 kWh
Took a cold and hence short shower.

Tiina Teekkari
04.05.14
0.00004 kWh
Unplugged mobile phone charger for the night.

Teemu Teekkari
30.04.14
91 (kWh/m²)/d
2 degrees, have to find my woolen stockings

Tiina Teekkari
28.04.14
2.1 kWh
Walked to see mommy

Raimo Random
20.04.14
0.012 kWh
Worked in the dark

Tips

Lowering the room temperature by one degree reduces the energy costs by 5%.
